Missouri Weekly Hay Summary 04/18/19

Spring field work is getting done but not quite at the pace most would prefer. Seems three or four days is about all that have occurred before moisture brings a two or three day pause. There has been some hay wrapped and some crops planted but again, pace has not been record setting. Several farmers are turning to grass now and are finally finishing what was an extremely stressful, expensive, and long feeding season. The supply of hay is light, demand is light to moderate and prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or to view the directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
